C. Briefly discuss major reason for sole-source or single-source procurement: As the work is being performed by the City of Leonard supervised by them, reimbursement for repair costs we the city. Upon visual observation and assessment, repairs to					sts will be made to				
		portions of streets adjacent to the site are both necessary and appropriate, given the number of transports entering the exiting the work site. ER has determined it is in the government's best interest to directly utilize the City of Leonard, Texas to repair portions of removal impacted streets, road shoulders and easements damaged during the project. This recommendation also alleviates quality control issues with use of an outside contractor as compliance with city codes and requirements are assured with city-controlled repairs.
